New Patch Techniques

Introducing 7 new decoration techniques that offer rich color, eye-catching detail and exciting texture. From dimensional effects to intricate details and innovative finishes, these patch techniques provide a unique opportunity to elevate your cap's design.

Scan for more information, design ideas and FAQ.

FlexStyle[™] Domed

Offers a shiny finish that creates a 3D effect, elevating brand logos or designs with a tactile experience. Available in both metallic and non-metallic finishes.

FlexStyle™ Flat

A 3D effect that appears flat yet dimensional, providing a subtle elevation to the design. Like the domed version, it comes in metallic and non-metallic finishes, offering versatility in branding applications.

Print Stitch

An innovative hybrid of embroidered and sublimated patch techniques, combining a full-color, photographic background with vibrant embroidery for added dimension and texture. This technique offers the best of both worlds, bringing designs to life with rich detail and depth.

Embroidered Appliques

High-quality embroidered appliques that mimic the appearance of direct embroidery. These patches come with a thin-stitched border and can be crafted into freeform shapes, perfect for detailed logos or designs.

Heat Transfer

Heat transers offer a sleek, durable alternative to traditional sewn-on decorations. Utilizing advanced adhesive technology, these decorations can be securely attached to a variety of caps without the need for sewing, providing a clean and seamless look.

Chenille

Known for their plush, textured surface, Chenille patches offer a classic look often associated with varsity letters and collegiate apparel. These patches are perfect for adding a touch of nostalgia or sophistication.

Woven

Utilizing a tight interlaced weaving process, woven patches allow for intricate designs with a high level of detail, without the need for fabric backing.

Featured Fabrics

Our Perforated Performance fabric allows for optimum air flow through its perforated side panels to increase cooling capabilities. This fabric has a jersey sheen that will complement any uniform.

At first glance, PHENOM looks like a heavy-duty canvas fabric, but you have to feel it to believe how soft it actually is. This is a performance twill you will likely find among other athletic apparel.

This player-accepted and in-demand performance fabric is a great fit with any baseball uniform.

ProTech Mesh is engineered for athletes. It has a lightweight fit with a stretchy, smooth texture.

This lightweight performance fabric is just like the caps the pros wear on-field. Its sharp and clean look, and moisture wicking properties keep you cool and dry during the most intense games.

Our Premium Wool Blend fabric is made with 2% spandex, so there is just enough give in the fit to make it even more comfortable. This fabric helps you achieve a classic throwback look without sacrificing technology or performance.
